

A wide-angle photograph of a large-scale open-pit mine. The mine is characterized by its terraced, layered rock walls, showing various shades of brown and tan. In the center, there is a large, flat area of greyish material, likely crushed rock or tailings, with a network of dirt roads and tracks. The foreground shows a sandy, dusty ground with visible tire tracks. The sky is clear and blue with a few wispy clouds. The overall scene depicts a massive industrial mining operation.

**پهنه اولیه اکتشاف ماده معدنی بور**

A large, conical pile of greyish-brown soil and rocks dominates the center of the image. The pile is composed of various sized particles, from fine sand to larger, angular rocks. The surrounding landscape is arid and rocky, with low, dark hills in the background under a blue sky with scattered white clouds. The ground in the foreground is sandy and uneven.
